## **GROSSDEUTCHLAND: GERMANY'S SUPER ARMY**

The following rules will help you incorporate these new units into your “*AMERIKA*” game. Feel free to pick and choose which ones to use so long as all players agree. These can help balance the game when players of differing skill levels play against each other, or add new dimensions and strategy for advanced players.

Panzer-Grenadier-Division Großdeutschland began as a ceremonial guard, but it eventually expanded into an entire Panzer Grenadier unit. This was one of best-equipped and heavily armed units in the entire German army, even better than most full strength panzer divisions. After defeating the Soviets, Großdeutschland was tasked with “maintaining the peace” in German occupied Reichskommissariat Russland. However, with the imminent invasion of Amerika, Großdeutschland was pulled out of Reichskommissariat Russland, expanded for overseas invasion, and loaded onto the first wave of invasion transports. This “Amerika Korps” was designed for one purpose: victory in *Amerika*.

[SET CONTENTS: 5 ACRYLIC MARKERS, 1 OF EACH](#)

**GROSSDEUTCHLAND TROOP** markers are placed under 1ea Infantry, 2ea Mech. Infantry, 1ea SParty and 1ea Medium Tank at the start of the game. If there are not enough units of these types in your starting army, those markers are lost for the remainder of the game. Each marker should be stacked on top of chips (with the appropriate figure on top of the marker) if there are a number of troops of that type, however it will only apply to one of them.

Units designated as Großdeutschland attack and defend better than their standard counterparts. Also, battle-hardened tactics gives them a better chance of destroying key targets in combat.

**Battle-Hardened:** Großdeutschland units score a Luck Shot on a 1 or 2.
