HE-343 JETBOMBER
A GLOBAL WAR 3D PRINTED EXPANSION SET

HistoricalBoardGaming.com
OVERVIEW

The He-343 was a jet powered tactical bomber design that never saw production. The He-343 would have carried 3000kg of ordnance and flown at speeds up to 519mph. For defense the He-343 would have carried two rear-facing 20mm cannons. The He-343 could also carry the Fritz-X, a German guided anti-ship missile.
