v1.1

## Overview

The Karl-Geräte was a German heavy siege mortar produced during World War II. Six guns entered service, many of which were nicknamed for Norse deities (e.g. Baldur, Odin, Loki, Thor). This set is modeled after the Thor which featured a 600mm gun. We also modeled the 540mm shorter barrel mortar which is available separately.

Historical Board Gaming's line of 3D printed sets are designated in rules as "TPD" followed by a letter (TPDA, TPDB etc...) so you rules can be referenced in future expansions. This set is TPDJ – our 10<sup>th</sup> 3D set. Global War 1939 and Axis & Allies 1940 rules have been added in the appendix.

---

The Thor was a 600mm tracked siege mortar unit in service with the German army during World War II. The mortar fired a 2,760lb shell up to 10km. Six of these units were built during the war and used primarily to attack fortifications and city defenses. They were slow moving and primarily transported by rail. Their heavy shells could penetrate between 8 and 11 feet of concrete.
